attack prevalence in the window
AnoShift
LITNET-2020
UGR'16
FORGE offline, Theorem 1
LTT, i.i.d.
conformal FNR, Şahin and Mert
π_{max}
best threshold at the window's π
FORGE offline, calibration mix
LTT at the estimated prevalence, plug in
fixed threshold, selection parts
δ
best threshold for every mix up to π_{max}
FORGE online, Theorem 1b
LTT at the estimated prevalence, upper bound
π of the calibration set
best threshold up to π_{max}
