
(a)
(b)
(c)
share of draws with FOR > ε
window, benign scores drifting
window, benign scores jumping
attacks
millions of dismissed flows
FORGE offline, Theorem 1
δ
upper bound
start of the violation
FORGE online, same window, Theorem 1b
attacks among the dismissed flows
ε times the dismissed flows
alarm
FORGE online, previous window
lower bound
windows after the jump of the benign scores
